

## **Aetna Plastics Acquisition Supports Regional Manufacturing Growth and Expansion**

Cleveland, November 8, 2019— [Aetna Plastics](#), a leading supplier and fabricator of industrial plastics materials and plastic piping systems, announces the acquisition of Cleveland Polymer, representing an important strategic development for both companies.

Aetna Plastics has 75 years of experience in supplying and fabricating plastic for industrial markets. This is the third acquisition for the plastics company and a show of support for the industry and the region.

Cleveland Polymer is a specialty supplier of plastic material and is known for high-quality custom fabrication. They bring broad knowledge and experience for all fabrication and distribution needs.

“We have been talking about the primacy of manufacturing and providing a foundation for economic growth as part of the overall mission for our region,” says Gary Davis, President of Aetna Plastics and Board Chair of [Manufacturing Works](#). “I am pleased we are able to further develop manufacturing sales and distribution with this acquisition. The combined talent and resources of these two companies will allow us to create exciting opportunities and deliver even more innovative solutions to our customers.”

### **About Aetna Plastics**

Aetna Plastics has 75 years of industrial plastics experience distributing a complete line of industrial plastics materials and plastic piping systems to customers worldwide and fabricating custom plastic products for high purity applications, manufacturing, and chemical processing. Aetna Plastics seeks to create customer value through continuous improvement with respect to product quality and customer satisfaction. It is our commitment to eliminate errors, provide on-time delivery, reduce waste, and improve efficiency as we strive towards sustained growth and prosperity.
